PROFILE

I design interfaces, then I build them. I focus on products where the interface decides whether people trust it: AI agents, on-chain finance and healthcare. Two years of product design and a year of shipping production frontends, from crypto-native marketplaces and identity systems to healthtech sites and independent redesigns.

EXPERIENCE

2024 - PRESENT

Independent UI/UX Designer & Frontend Engineer

REMOTE

- Aegis

aegis-bot-fawn.vercel.app

NON-CUSTODIAL AI RISK GUARDIAN • SOLANA • DESIGN + BUILD

An AI guardian that protects tokenized-stock and DeFi positions without ever taking custody. Plain-English rules become on-chain policy; on a breach the agent triggers a live swap that cuts exposure, with a real-money round-trip proven on testnet.
- Veris

veris-protocol.vercel.app

DATA MARKETPLACE FOR AI AGENTS • MONAD • DESIGN + BUILD

ERC-8004 identity and reputation with a self-enforcing freshness guarantee: signed, block-stamped proofs and automatic refunds when data goes stale, shown as live consoles so the guarantee can be watched, not just claimed.
- AgentBazaar

agentbazaar-web.vercel.app

VERIFIABLE AI AGENT MARKETPLACE • HEDERA • DESIGN + BUILD

Designed and built from scratch: agents are discovered, paid with x402 micropayments and verified through an HCS audit trail, across a landing page, explorer, deploy studio and dashboard.
- Umbra Pay

umbra-pay-six.vercel.app

PRIVATE ON-CHAIN PAYROLL • UI/UX, INTERFACE + FRONTEND

Payroll employers can run on-chain without exposing salaries to block explorers. Re-architected twice as the privacy backend evolved, keeping the core guarantee intact.
- Chog Dash

chog-dash.vercel.app

BROWSER GAME • CHOG COMMUNITY • INTERFACE + FRONTEND, TEAM

Designed and built the game's interface: modes, onboarding, ranks and quests that stay readable over a moving space scene.
- Healthtech sites

habeebat-nurse-portfolio.vercel.app

TRUST-FIRST DESIGN FOR MEDICAL AUDIENCES • DESIGN + BUILD

Redesigned a practising nurse and midwife's site and designed a portfolio site for medical students: clinical credibility as a clean, patient-facing presence.
- Item7 Go

MOBILE APP REDESIGN • SELF-DIRECTED CASE STUDY • UI/UX • FIGMA

Redesigned a food pickup app end to end, from onboarding and pickup zones to the meal builder, cart and order history.

AVAILABILITY

- Open to full-time and freelance
- Remote, from Nigeria (WAT)

SKILLS

DESIGN

- Figma
- UI Design
- UX Research
- Wireframing
- Design Systems
- Accessibility

BUILD

- Web Development
- React / Next.js
- TypeScript
- Solidity
- Python
- ZK Proofs / FHE

EDUCATION

- Zero To Mastery Academy
- UI/UX Design & Web Development
- University of Ilorin
- B.Sc. Human Physiology

LANGUAGES

English

KIND WORDS

- Nah this is beautiful. I love it.
- Adeleke Habeebat, client • site redesign
- Interface is looking good o.
- Coachdee, teammate • Chog Dash
